### **EMCOR Group (UK) Helps British Airways Property Services Achieve the Carbon Trust Standard**

EMCOR Group (UK) is pleased to announce that its energy management team has helped British Airways Property Services achieve the Carbon Trust Standard. Launched in June 2008, the Carbon Trust Standard is the world's first carbon award that requires an organisation to measure, manage and reduce its carbon footprint and actually make real reductions year-on-year. The accreditation lasts for two years, during which time continuous improvement must be maintained. EMCOR Group (UK) provides engineering services, facilities management and sustainable business solutions for a diverse range of private and public sector organisations.

EMCOR has been working as British Airways' facilities management partner for more than 17 years and over the past three years has worked closely with British Airways Property Services to reduce energy use across its property portfolio by around 8%, resulting in a significant impact on its annual energy costs and supporting British Airways' wider industry leading target of reducing its net CO<sub>2</sub> emissions by 50% by 2050. Since April 2007 EMCOR has helped British Airways reduce CO<sub>2</sub> emissions by approximately 9,230 tonnes, the equivalent to heating almost 3,000 average UK homes each year.

EMCOR's energy management team has helped British Airways Property Services attain the Standard after reducing its carbon footprint through a raft of energy efficiency initiatives. While British Airways Property Services has made a number of investments in cutting emissions, such as upgrading to more energy efficient air

conditioning equipment and low energy hangar lighting solutions, it has also achieved significant carbon savings through low-cost initiatives, such as upgrading equipment controls and awareness campaigns for staff and contractors to target energy wastage.

EMCOR has worked in partnership with British Airways since 1992 and provides a total facilities management service to 800,000 square metres of facilities across 75 buildings, including British Airways' new flagship Terminal 5 at Heathrow.

Andrew Brown, Director of Airport Services for EMCOR said: "British Airways Property Services' achievement of the Carbon Trust Standard is testimony to EMCOR's commitment to helping its clients achieve their environmental objectives and reduce their carbon footprint. The Carbon Trust Standard recognises those businesses making genuine reductions in their carbon emissions. He added: "In this current climate, every business should be asking how much money their company can save; EMCOR can help its clients create sustainable businesses for the future."

Vance Williamson, Head of Property Services for British Airways said: "We are delighted to achieve the Carbon Trust Standard for our property services division, the first in our industry to do so. This certification reflects the efforts of both British Airways Property Services and our partners in EMCOR to deliver continual improvement through our energy management strategies. This Standard provides an objective benchmark against which our commitment and success in addressing the carbon footprint of our estate can be measured."

Harry Morrison, General Manager Carbon Trust Standard, said: "Increasing collaboration between landlords, tenants and outsourced providers is essential to successful carbon and energy efficiency. All organisations need to look at the performance of their buildings, offices and call centres to help us create a low carbon economy. Being certified with the Carbon Trust Standard demonstrates that British Airways Property Services has taken genuine action to cut carbon emissions from their estate, and that they are committed to making year on year reductions in the future."

## Notes to editors

### About EMCOR Group (UK) plc

With over 100 years experience in the UK market, EMCOR Group (UK) plc provides engineering services, facilities management and sustainable business solutions for a diverse range of private and public sector organisations, through its two businesses --- EMCOR Engineering Services and EMCOR Facilities Services. EMCOR Group (UK) plc is a wholly owned subsidiary of EMCOR Group, Inc. (NYSE:EME), a Fortune 500 company with estimated 2010 revenues of \$5.0 billion, EMCOR Group, Inc. (NYSE: EME) is a global leader in mechanical and electrical construction, energy infrastructure, and facilities services. A leading provider of critical infrastructure systems, EMCOR gives life to new structures and sustains life in existing ones by its planning, installing, operating, maintaining, and protecting the sophisticated and dynamic systems that create facility environments---such as electrical, mechanical, lighting, air conditioning, heating, security, fire protection, and power generation systems---in virtually every sector of the economy and for a diverse range of businesses, organisations and government. EMCOR represents a rare combination of broad reach with local execution, combining the strength of an industry leader with the knowledge and care of 170 locations. The 25,000 skilled employees of EMCOR have made the company, in the eyes of leading business publications, amongst the "World's Most Admired" and "Best Managed". EMCOR's diversity---in terms of the services it provides, the industries it serves and the geography it spans---has enabled it to create a stable platform for sustained results. The Company's strong financial position has enabled it to attract and retain among the best local and regional talent, to undertake and complete the most ambitious projects, and to redefine and shape the future of the construction and facilities services industry. Additional information on EMCOR can be found at [www.EMCORUK.com](http://www.EMCORUK.com).

### About British Airways Property Services Carbon Trust Standard certification

The Carbon Trust Standard's certification of British Airways Property Services carbon footprint includes buildings in the UK managed by BA Property but not including BA operational assets such as aircraft or engineering vehicles. Included within the organisational boundary are vehicle assets owned by EMCOR Facilities Services Ltd, BA's FM partner, which are based at BA Property sites and used exclusively for the BA contract.

BA Property Services is part of BA Shared Services (Finance & Performance Directorate) BA Property manages an estate comprising Industrial, Commercial Offices and Terminals.

*This release may contain certain forward-looking statements within the meaning of the Private Securities Reform Act of 1995. Any such comments are based upon information available to EMCOR management and its perception thereof, as of this date, and EMCOR assumes no obligation to update any such forward-looking statements. These forward-looking statements may include statements regarding market opportunities, market share growth, gross profit, backlog mix, projects with varying profit margins, and selling, general and administrative expenses. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from the forward-looking statements. Accordingly these statements are no guarantee of future performance. Such risk and uncertainties include, but are not limited to, adverse effects of general economic conditions, changes in the political environment, changes in the specific markets for EMCOR's services, adverse business conditions, availability of adequate levels of surety bonding, increased competition, unfavourable labour productivity and mix of business. Certain of the risks and factors associated with EMCOR's business are also discussed in the Company's 2008 Form 10-K, its Form 10-Q for the third quarter ended September 30, 2009, and in other reports filed from time to time with the Securities and Exchange Commission. All these risks and factors should be taken into account in evaluating any forward-looking statements.*
