

A collage of images featuring modern glass skyscrapers and buildings. The central image is a large, curved glass facade reflecting a blue sky with white clouds. To its right is a tall, rectangular skyscraper. Below the main image are several smaller, overlapping rectangular images in various colors (teal, yellow, white) showing different architectural details and building exteriors.

➔ **Holding a Comprehensive
Energy Services BPA in all
11 GSA Regions and all
11 Energy SINs.**

➔ **Save On Energy Costs Without
Spending Time On “Red Tape”**

We're here for you.

Let EMCOR help make you more energy efficient now

Using BPAs, federal agencies can save time and money by reducing the administrative burden of contract management... undertake money-saving building optimization and energy efficiency projects **FASTER**.

EMCOR has locations in all 11 GSA regions and is authorized to do work through the GSA under all 11 Special Item Numbers (SINS) for comprehensive energy services. That means virtually no matter where you are or which energy services you need; you don't have to complete a lot of time-consuming administrative procedures before EMCOR can start your project. And if several facilities within or among GSA regions need multiple services, they can obtain them all through one convenient, single source.

Count the Benefits

- » Fast, easy compliance with energy efficiency and green building requirements.
- » No time filling out forms or dealing with procurement "red tape."
- » No risk since EMCOR is pre-qualified.
- » No uncomfortable negotiations: pricing meets GSA's standards.
- » No dollar restrictions for ordering energy services.

Why EMCOR Energy Services? Single-source Provider of all BPA Energy Services

- » Energy Management & Planning
- » Energy Training
- » Metering
- » Energy Program Support
- » Commissioning
- » Energy Audit Services
- » Resource Efficiency Management
- » Innovations in Energy
- » Water Conservation
- » Ancillary Repairs & Alterations
- » Other Direct Costs
- » Approved to Provide Energy Services Nationwide in all US Territories

The EMCOR Advantage

In awarding EMCOR a BPA, the GSA has recognized that we have the expertise, experience, skills, and capabilities needed to meet yours and the government's energy and sustainability goals!

A Fortune 500® company, EMCOR has provided government clients with 27 years of exceptional performance. We have managed energy projects in more than 25,000 buildings with over 1-billion square feet of space, resulting in \$500 million in annual energy savings in just the last six years!

We're already familiar with the challenges you face in reducing energy consumption, greenhouse gas emissions, and water conservation. We're up-to-speed on the Recovery Act, EISA, EPACT 2005, and other executive and legislative requirements.

Call EMCOR Now and Get Started

To begin, all you have to do is call us. It doesn't matter if you've already started your project or aren't sure where to begin, we'll evaluate your property and explain what needs be done. And we'll create innovative solutions that transform your facilities into sustainable, high-performance operations... we can be working to solve your energy challenges in less than one week!

➔ Get Your Energy Savings Faster with these Quick Turnaround Services:

EES Energy Solution:	Outcome & Benefit to You:
Retrocommissioning	<ul style="list-style-type: none"> - Achieve up to 15% energy savings - Quick payback projects, typically 1-year simple payback period - Reduction in green house gas emissions - Persistent energy savings for up to 5 years - Non-energy advantages like improved comfort and safety
Energy Audits	<ul style="list-style-type: none"> - Programs, improvements, and projects to cut energy waste up to 25% - Lower energy costs and GHG emissions - Real-world practical solutions to reduce water use - Supply-side projects to achieve energy independence
Sustainability & Energy Management	<ul style="list-style-type: none"> - Prioritize energy and environmental projects based on lifecycle ROI - Strategies to gain long-term control over your energy future - Short-term strategies for immediate energy savings and GHG reduction - Compliance with federal energy and environmental legislation
GHG Reporting	<ul style="list-style-type: none"> - Reduction targets for energy intensity and fleet - Full accounting for continuous improvement - Business case for investment in renewable energy - Compliance with Executive Order 13514

What can we do for you?

EMCOR Energy Services has the extensive experience and leading-edge expertise you need to select systems and services that will bring you quickly and effectively into compliance with all government energy standards. Together, we can create a better energy future!
