

Strengthening **America's infrastructure**
is more than a good idea. **It's a call to action.**

As the federal government makes a massive reinvestment in our country's infrastructure, **EMCOR stands ready and able to serve.** We will put to work our considerable expertise in infrastructure development and maintenance to build stronger, smarter facilities all across the country.

EMCOR

Build. Power. Service. Protect.

Energy Infrastructure

EMCOR designs and builds a broad variety of energy management projects and systems that give clients greater control over their energy use, sourcing, and costs.

6:51 pm

Abilene, TX A Cooler Future

EMCOR IS HERE

EMCOR is building and installing the mechanical, plumbing, and specialized air-quality systems for the Vestas Wind Turbine Tower Manufacturing Campus in Pueblo, Colorado. When fully operational, the new 600 thousand square-foot facility—the largest of its kind in the world—will produce more than one thousand towers a year.

Water Infrastructure

EMCOR designs and builds water-treatment, conservation, and management systems that address the country's growing need for clean, safe water.

7:02 am

Brooklyn, NY A Warm Wake-Up

AND HERE

EMCOR is installing electrical systems for several structures, including a control building and three freestanding electrical support facilities, for the Newtown Creek Water Treatment Plant upgrade in Brooklyn, New York. This 10-year infrastructure project, one of the largest in New York City, will help to ensure a steady supply of clean water to New York residents for years to come.

Transportation Infrastructure

EMCOR designs and builds sophisticated systems that help make air travel smooth, safe, and efficient.

4:43pm

Chicago, IL A Safer Trip

AND HERE

For the modernization program at O'Hare International Airport in Chicago, EMCOR built two new remote transmitter receiver sites for the FAA and installed, connected, and tested a new fiber-optic loop system supporting more than 220,000 feet of fiber-optic transmission line. In addition, EMCOR installed a new surveillance radar system for the airport's North Airfield.
