

# Southern California Edison

ROSEMEAD, CA

## VALUE DELIVERED

To help Southern California Edison (SCE) enhance energy efficiency and achieve a positive environmental impact, we provided turnkey installation of more than 250 electric vehicle (EV) charging stations in more than 65 locations throughout Southern California.

Our ability to deliver EV charging stations from concept to reality helps SCE enhance their competitive advantage in the marketplace. Our services also assist SCE in meeting the growing demand from employees and customers driving electric vehicles.

# CASE STUDY

## OPERATING COMPANY

Dynalectric L.A.

## CLIENT

Southern California Edison

## CLIENT OBJECTIVES

To fulfill their initiative to provide EV charging stations throughout their service area, SCE needed comprehensive electrical infrastructure and equipment installation.

## SOLUTIONS

Our solutions include installing charging stations, switchgear, transformers, panels, and all the necessary infrastructure for complete electric vehicle charging stations.

## CLIENT BACKGROUND

SCE is one of the nation's largest electric utilities, delivering power to 15 million people throughout Southern California.
