 - Commissioning/decommissioning
 - Reassembly, installation, and reconnection

Robotics

- » Installation
- » Programming
- » Mapping
- » Maintenance and support

Fabrication

- » Welding
- » Structural Steel
- » HVAC Ducts

A Full-Service Millwright Firm. Completely Dedicated to Serving Client Needs.

Since 1993, Cherokee Millwright, Inc. (Cherokee) has been providing top-notch millwright, mechanical, and robotics services to clients across Tennessee and Kentucky. The company was founded to fulfill the growing need for a full-service millwright company that treats customers like family and equipment with care. Cherokee is affiliated with Southern Industrial Constructors, a leading provider of turnkey industrial construction and plant installation, relocation and maintenance services.

Projects That Are Completed Quickly. Correctly. And Cost-Effectively.

Millwright

Cherokee offers a full suite of millwrighting services that includes installing, setting, aligning, and leveling various types of machinery and equipment. This includes dismantling, refurbishing, moving and reassembling machinery and equipment, and close tolerance and precision alignment (optical and laser). As one of the first millwright companies in the state of Tennessee to use precision laser alignment to align couplings, Cherokee is a true machinery and conveyor assembly/installation specialist.

Robotics

Cherokee's Robotics Division has the ability to install, program, maintain, and provide support for the implementation of automated-guided vehicles (AGVs) and self-driving vehicles (SDVs) for manufacturing facilities, production warehouses, and other industrial applications.

Fabrication

Cherokee's team of experienced welders offer extensive fabrication options for stainless steel, carbon, galvanized, aluminum, and copper. Additionally, this talented team of welders can fabricate structural steel, sheet metal, and even structural add-ons like mezzanines. And if the piece a client needs for a project can't be fabricated onsite, Cherokee has a 34,000-square-foot state-of-the-art fabrication facility design to handle any need that arises.
