

Community service – and services. As an integral contributor to the nation's infrastructure, EMCOR's responsibilities encompass critical public and government facilities that keep our communities running smoothly, reliably and efficiently.

We continue to build, power, service and protect some of the most technically complex facilities on the planet. With heating/cooling, air quality, security, and energy-efficiency technologies constantly leap-frogging to new heights, EMCOR's expertise becomes even more indispensable for the development of a wide range of public and government facilities across the country.

BUILD. POWER. SERVICE. PROTECT.

Our work touches millions on a daily basis.

BUILD. From the early stages of facility planning and design using CAD and BIM, through all phases of construction, EMCOR expertise plays a key role in the building of public and government structures nationwide – thanks to a unique set of skills, qualifications and services.

HVAC, lighting, plumbing, air & water quality systems, security, automation services, green solutions – if it involves the workings of a building, EMCOR has the field-proven experience to provide the smartest options available. Our job is to help ensure constructability, maintainability, and sustainability – we do that with a blend of technical expertise, delivery services and Fortune 500® financial stability.

EMCOR Mechanical capabilities include:

- ▶ Building Automation Systems
- ▶ Chiller Services
- ▶ Fabrication / Prefabrication
- ▶ Emergency Systems Generators
- ▶ Fire Protection
- ▶ HVAC Services
- ▶ Industrial & Process Piping
- ▶ Plumbing
- ▶ Refrigeration
- ▶ Sheet Metal
- ▶ Testing, Adjusting & Balancing
- ▶ Computer Aided Design (CAD)
- ▶ Building Information Modeling (BIM)
- ▶ LEED® Accredited Professionals
- ▶ Sustainable Mechanical Solutions

EMCOR Public/Government

POWER. EMCOR is a proven global leader in electrical construction services – it's one of our strongest core capabilities. Every day, coast to coast, we apply our technical expertise toward meeting the electrical challenges of facilities for virtually any industry or sector.

EMCOR provides expert advice on the design of electrical systems to ensure constructability and maintainability, as well as install AC/DC power systems, alternative power solutions, intelligent highway systems, building plant and lighting, cable tray installations, explosion-proof systems, supervisory control, data acquisition (SCADA) systems – and that's just a sample of our electrical services portfolio.

SERVICE. On-site. On-budget. EMCOR provides site-based facilities management, operations, maintenance and consulting services for single buildings, campus settings and national portfolios.

Who better to provide proper service than the experts who build and power complete public and government facilities? Keeping your facility operating at peak efficiency, complying with requirements, and promising cost efficiencies across the board all put EMCOR at the forefront.

As maintenance professionals, we're ultra-sensitive to vendor and equipment selection, proper chemical use, and non-disruptive service schedules. We also adhere to ISO 9001:2008-certified processes, and we guarantee our performance 100%.

PROTECT. EMCOR has entire teams in place to protect your staff, property, privacy and expensive equipment – so you can conduct business without concern. We provide life safety solutions that include fire detection systems, suppression systems, and the most advanced security technology available today.

Because of their public nature, facilities with an open-door policy are vulnerable. EMCOR understands this, so we offer a full range of protection services, and the ongoing maintenance services to keep them operating reliably. From pass systems and CCTV, to perimeter security and fire control, on EMCOR's watch, you can feel secure knowing that your facilities are secure.

EMCOR Electrical capabilities include:

- ▶ Computer Aided Modeling (CAD)
- ▶ Building Information Modeling (BIM)
- ▶ Complete Electrical Distribution Systems
- ▶ Customized Maintenance Programs
- ▶ Fire Alarm Systems
- ▶ High & Low Voltage Services
- ▶ Life Safety Systems
- ▶ Sustainable Electrical Solutions

Superior service – and services:

- ▶ Integrated Facilities Management
- ▶ Facilities Diagnostics
- ▶ Renovations & Retrofits
- ▶ Energy Audits
- ▶ Property Condition Assessments
- ▶ Security, Cleaning, Catering, Landscaping
- ▶ Preventive & Predictive Maintenance

Well-equipped to keep your facility well-protected:

- ▶ Equipment Inspection
- ▶ Retrofit & Remodeling
- ▶ Fire Sprinklers/Extinguishers/Alarms
- ▶ Fire Alarm & Detection
- ▶ Emergency Back-up Power & Lighting

24/7 response to emergency situations.

EMCOR teams are available at any moment, of any day, to perform as your changing needs require. Our technologies are mobile – just like our people. Peace of mind is built into every EMCOR public or government facility service.
